Know the True Identity of Your Customers

In the era of large-scale data breaches, identity theft and account takeover, businesses need a reliable way to determine if someone is who they claim to be online. Jumio Identity Verification uses informed AI, machine learning and biometrics to help companies improve conversion rates, comply with AML and KYC regulations and better detect fraud — all while delivering a definitive yes/no decision in seconds.

Product Highlights

- Intimidate fraudsters and detect fraudulent transactions before they are processed.
- Deliver a state-of-the-art user experience highlighted by the use of selfies to prove customer presence.
- Transform ‘customer not present’ transactions into ‘ID present’ transactions.
- Gain anti-spoofing detection via FaceTec’s certified liveness detection.
- Verify identity in real time using informed AI, machine learning and biometrics.

Mobile phone account takeovers are on the rise.
