jumio. Online Gaming

Create a Winning Online Gaming Experience with Identity Verification

Jumio offers industry-leading identity verification solutions to help gaming operators verify the age of players, detect online fraud, fight account takeover and simplify the onboarding process. Offering a great experience is essential to keeping your players interested, from the moment they create an account and each time they interact with your gaming site.

The Benefits

Age Verification	Reliably verify the age of players with an identity document (ID) scan that can detect if the ID is authentic.
Streamlined User Experience	Provide an intuitive, user-friendly experience on all channels without compromising security.
Compliance	Automatically screen new players with comprehensive, real-time global coverage of sanctions, watchlists, PEPs and adverse media, while also enabling access to 1+1 and 2+2 checks for enhanced identity verification and due diligence.
Risk-based Decision	Reduce time-intensive manual reviews. Jumio calculates the fraud risk and approves or rejects the identity transaction in seconds based on your predefined risk tolerances.
Omnichannel Support	Seamlessly integrate identity verification into your existing workflows via our web and mobile SDKs, APIs or hosted web client.
Fraud Detection & ATO Prevention	Reduce account takeovers and friendly fraud by revealing the true identity of the player during onboarding and high-risk transactions.
Biometric Authentication	Speed up the authentication process and deliver a definitive match/no match determination in 2-3 seconds for high-risk transactions.

The Player Experience

Leading the Way in Seamless Identity Verification

Now offering identity verification for Brazil CNH Digital with an included CPF check, and expanded regional digital ID acceptance coming soon.

Leverage the Latest Technologies

With Jumio, companies can quickly and accurately connect a player's online identity with their real-world identity to optimize conversions, deter and detect fraud and meet KYC/AML mandates.
