jumio | Go

100% Automated, Real-Time Identity Verification

Jumio Go is our fastest-ever, fully automated identity verification solution. Powered by AI, Jumio Go enables modern enterprises with a reliable way to verify remote users, ensuring that someone is who they claim to be online. Increase conversions, reduce abandonment rates and deliver real-time identity verification with Jumio Go.
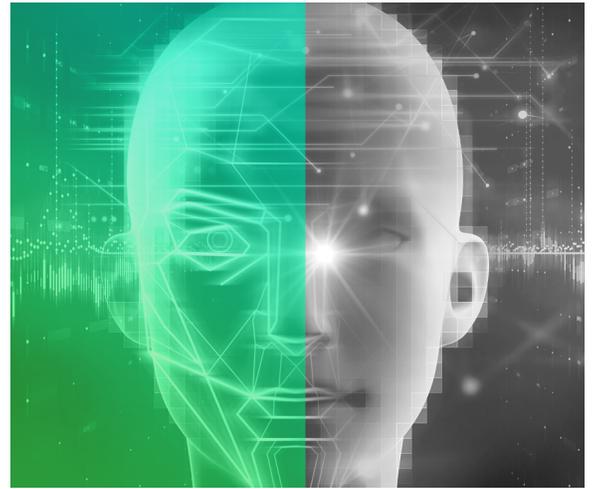

Fully automated onboarding

Stop fraudsters in their tracks

Comply with AML & KYC regulations

How It Works

Jumio Go combines AI, OCR and state-of-the-art liveness detection to automatically extract ID document data and validate the user's digital identity in seconds. As part of this identity verification process, Jumio Go compares the picture extracted from the ID document with a selfie of its presenter through biometric face comparison.

1. ID Check

Is the identity document (ID) authentic and valid?
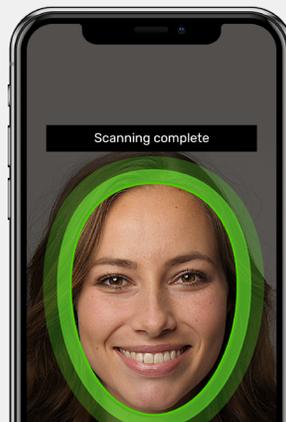

2. Selfie + Liveness Check

Is the person holding the ID the same person shown in the ID photo? Are they physically present during the transaction?

3. Risk-based Decision

Jumio calculates the fraud risk and approves or rejects the identity transaction in seconds based on your predefined risk tolerances.

Solution Highlights

Unrivaled Speed
Employs AI, OCR and biometrics to deliver our fastest identity verification solution ever.

Data-Driven AI
Exploits the power of massive production data sets and machine learning to spot patterns and better detect when an ID has been manipulated or altered in any way.

Advanced Liveness Detection
Detects and deters advanced spoofing attacks including deepfakes with state-of-the-art liveness detection that has achieved Level-2 certification for ISO 30107-3 iBeta Presentation Attack Detection (PAD) testing.

Global Coverage
Global Coverage Supports more than 1,500 ID types across the globe, helping enterprises scale to serve an increasingly international customer base.

Omnichannel Support
Supports a wide range of customer implementations, including web and SDKs (iOS & Android), APIs, and a hosted web client.
