

## A Unified, End-to-End Identity Verification and eKYC Platform

Jumio KYX is the trusted identity platform for businesses that love customers and despise fraud. Customers, users, patients, employees ... whoever the "X" is in your business, Jumio's single end-to-end platform delivers the assurance you need to know, then trust.

### Identity Assurance: Orchestrated by You.

The Jumio KYX Platform adapts to the unique needs and risks of your business and provides the right set of services to balance your need for security and convenience.

## Identity Proofing and Corroboration

### Address Services

Validate and corroborate the user's address with independent, third-party sources.

### Identity Verification

Automated and hybrid solutions for identity proofing that deliver the industry's highest level of verification accuracy.

### Biometrics

Advanced liveness detection and face matching technologies for unsurpassed identity assurance and ease of use.

### Fraud

Dramatically reduce new account fraud with anomaly detection, blocklist checks and a required selfie.

### Databases

Automated database pings, including government watchlists, DMV and PEPs and sanctions, help identify fraud and AML risks faster.

### Signals (coming soon)

Jumio will be releasing new features in the coming months that provide incremental fraud signals to better assess new customer risk.

### Biometric-Based Authentication

Unlock user accounts with a process that is as simple as a selfie and more powerful than SMS-based 2FA methods.

### AML Screening

Screen new users against global and regional sanctions and watchlists, PEPs data and adverse media.

### Transaction Monitoring

Provide ongoing transaction monitoring to empower your compliance team to make better decisions faster and mitigate the threat of financial crime.

## The KYX Engine

### User Experience

Award-winning UX keeps good customers moving forward.

### AI/Machine Learning

Powered by AI and machine learning with unmatched real production data sets.

### Security

Bank-grade security and compliance features help protect user data and privacy.

### Global Coverage

Anytime, anywhere, Jumio covers over 200 countries and territories and more than 3,500 ID types.

### Custom Workflows

Consume KYC services based on your unique use case, risk appetite and budget.
