

## Accelerate Trust in Digital Document Signing

Customers are increasingly demanding the ability to sign documents digitally. But how can you be sure the right person is actually signing the document and at the same time avoid introducing unnecessary friction? Digital document signing companies are struggling to provide a great user experience as well as a highly effective Know Your Customer (KYC) solution that prevents fraud by remote users.

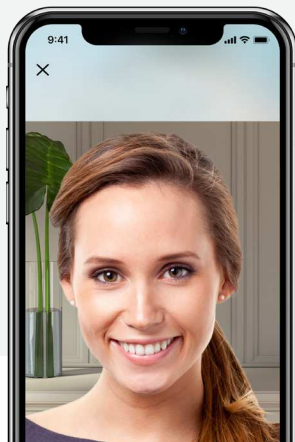

### Jumio's Solutions for Digital Signing

Jumio's solutions streamline digital trust for digital document signing companies. Seamlessly integrate **Jumio Identity Verification** into your document signing process to ensure the user is who they say they are before they sign a document.

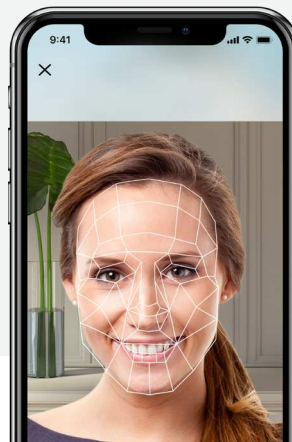

**Step 1:**  
**ID Proofing Check**

Is the ID document authentic and valid?

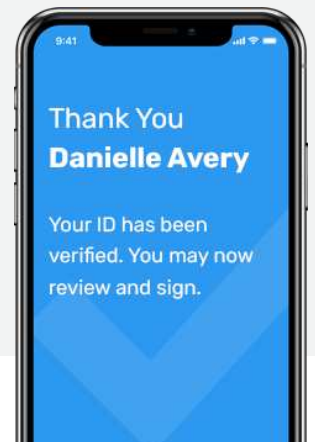

**Step 2:**  
**Similarity Check**

Is the person holding the ID the same person shown in the ID photo?

**Step 3:**  
**Liveness Check**

Is the person holding the ID physically present during the transaction?

**Step 4:**  
**Definitive Answer**

Jumio's Identity Verification delivers a definitive yes or no answer in seconds.

Whenever the user needs to sign another document, **Jumio Authentication** makes it simple for the user to prove they're the same person you verified by simply taking another selfie.

## Key Benefits

### Reputation Management

Show constituents that you take the protection of their personal data and benefits seriously.

### Cross-platform Support

Jumio seamlessly integrates into websites and iOS or Android applications via APIs, SDKs and webcams.

### Compliance Mandates

Meet regulatory guidelines and best practices by ensuring that your users are who they say they are.

### AI-driven Innovation

Jumio uses artificial intelligence and machine learning to reliably extract key data from government-issued IDs and find anomalies in manipulated IDs.

### Scale and Global Coverage

Jumio has processed over 1 billion transactions, supports 5,000+ ID types in over 200 countries and territories.
